## **JACK E4 DIRECT DRIVE OVERLOCKER:**

### **E4 High Speed Direct Drive Overlocking Series:**

- Comes in 3 models: 3-Thread, 4-Thread (Mock Safety), and 5-Thread (Safety Stitch).
- Uses energy-saving technology for quiet and efficient operation.
- Features a self-lubricating system to reduce friction, heat, and metal wear.
- Electronically adjustable maximum speed.
- Designed for industrial overlocking applications.

### **Jack 6 Thread Overlocker:**

- Uses direct drive and energy-saving technology.
- Low electricity consumption, quiet operation and low vibration.
- Can function as a 3-thread, 4-thread or 5-thread overlocker.
- Allows easy switching between woven and knitted fabrics without changing machines.
- Ideal for CMT factories needing versatility in fabric handling.
